

TIMOTHY D.  
**DOERR** M.D.  
FACIAL PLASTIC SURGERY

#### MEMBER AAFPRS

The American Academy of Facial Plastic and Reconstructive Surgery is the world's largest specialty association that represents over 2,700 facial plastic and reconstructive surgeons throughout the world. The AAFPRS is a National Medical Specialty Society of the American Medical Association (AMA), and holds an official seat in both the AMA House of Delegates and the American College of Surgeons board of governors. AAFPRS members are board certified surgeons whose focus is surgery of the face, head, and neck. AAFPRS members subscribe to a code of ethics.

Specialization in medicine has been one of the major enhancements in patient care over the last generation. AAFPRS members not only have a precise focus in patient care but they also have had more comprehensive training in facial surgery than any other medical specialty.

All AAFPRS members are board certified by a specialty board recognized by the American Board of Medical Specialties.

- Vascular Malformations
- General Otolaryngology

#### PHILOSOPHY OF CARE

As a surgeon, I strive every day to satisfy the needs of my patients. I want them to benefit from my expertise in facial plastic surgery and my training and experience in otolaryngology, the surgical specialty dealing with structures of the head and neck.

My philosophy of care is based on the following fundamentals:

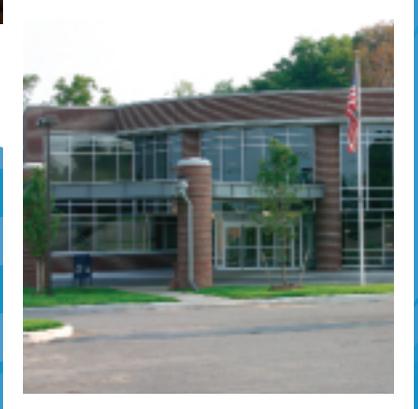

- **TRUST.** This is the absolute foundation for a good patient-surgeon relationship.
- **CONFIDENCE.** Whether patients desire elective cosmetic facial surgery or need reconstructive surgery, my training and experience should be a source of confidence and comfort to them.
- **EXPERTISE.** As a facial plastic surgeon also trained in otolaryngology, I recognize and understand the functional—as well as the aesthetic—considerations of facial surgery. I pride myself in meeting a patient's desired goals while ensuring that any altered structures will continue to work correctly.
- **SATISFACTION.** I enjoy the opportunity to provide my patients a rewarding result from successful surgery, whether it's restoring their functional ability or enhancing their self-esteem with a satisfying new appearance.

If you are thinking about facial plastic surgery, please consider the added benefit of selecting a fellowship trained facial plastic surgeon with a background in otolaryngology to perform the task. I look forward to earning your trust.
